FEATURES OF WORKING WITH TEXT AND CONTOURS IN ADOBE

PHOTOSHOP GRAPHIC EDITOR

Haydarova Barchinoy Hakimjon kizi

KSPI "Mathematics and Informatics" course

4th grade student

ABSTRACT:

Adobe Photoshop has several options for working with text. It is carried out with the help of equipment for displaying texts on the screen. After receiving the equipment, the mouse is clicked once on the part of the page where the text should be written and the text is entered through the keyboard. You need to click one of the prohibition or approval symbols from the formatting panel where the text is entered.

KEY WORDS: Normal text, Symbol, text properties, outline, change the shape of text letters.

All text settings are made from the "Symbol" panel. Setting the font, distance between words, text height, whether the letters are higher or lower than the line (level or index), interval between lines, distance between letters, letter width, color and other parameters. possible

Using the "Paragraph" panel, you can align the text to the right, left or center, set paragraphs and indents. After changing all the parameters, it is necessary to press the confirmation icon. A new layer will appear after this working weapon is used. The following will be active in the properties bar: Normal text or text border status, change text orientation, change the shape of text letters, change the

appearance of text letters (bold, italic, underlined), change the size of text letters change, change the type of text borders, place the text in the paragraph: the field to change the color of the text on the left, middle or right side, it will be possible to work with the cases of text skew, change the text properties.

To place texts on an object (trajectory), the - command is used. After clicking on the command, a dialog box will open, indicating which trajectory to place, and then the radius of curvature, the degree of horizontal and vertical oscillation. By pressing the OK button, the displayed parameters will be activated. By selecting the text and choosing the desired appearance from the "Style" panel, the text can be given certain methods.

A contour is a line used by the program to draw objects and forms the structure of the object. The outline can then be used as a fill and border and printed. The program has dashboard commands for working with contours:

Editing text. Before making changes to the text, activate it and make changes by selecting the word, sentence and letter in the text. Also, just click on the frame to mark the text.

Summary

During the pedagogical internship at the 37th school of the Uchkoprik district, we directly participated in the Informatics classes and got acquainted with the state of teaching computer graphics to students in educational activities. In particular, we were convinced that the innovative methods used in the teaching of various relevant departments of computer graphics in the course of training in this school can be developed based on the above recommendations and suggestions.
