## **SOCIAL-PEDAGOGICAL FACTORS OF PROFESSIONAL AND PERSONAL PREPARATION OF ACADEMIC LYCEUM STUDENTS OF THE MINISTRY OF INTERNAL AFFAIRS**

Ismoilov Alisher Ulugbekovich,

Head of the Andijan Academic Lyceum of the Ministry of Internal  
Affairs of the Republic of Uzbekistan

### **Abstract**

This article deals with the formation of professional personal qualities of academic lyceum students.

**Keywords:** legal culture, legal consciousness, rights and duties, culture formation, legal theory.

Developing the spirituality of not only academic lyceum students, but also every young generation growing up in our country is one of the most important tasks of our society. After all, "it is said that the relationship between the spiritual and spiritual state of a person and society, the balance of mutual influence is related to spirituality, and if it is disturbed, it will lead to chaos." President of Uzbekistan Shavkat Mirziyoyev said: "In order for our youth to grow up to be independent thinkers, have high intellectual and spiritual potential, and become happy people who are equal to their peers on a global scale in any field, and we will mobilize all the forces and possibilities of our society" - shows that it is impossible to allow deficiency in the process of spiritual growth. Vocational spiritual education consists of objectively based processes of directing people to physical and mental

work or other useful activities for society, and at the same time preparing them to perform multifaceted social tasks.

It is known that professional and cultured, spiritually mature people have been respected by our people since time immemorial. In Uzbekistan, there is a great need for knowledgeable, well-versed in their profession, independent thinkers, creative approach to their profession, highly qualified, cultured, inquisitive, aspiring, and highly spiritual professionals. Based on this, the issue of training specialist personnel in the Republic of Uzbekistan is one of the most urgent and important issues.

Conceptual aspects of professional spirituality in the professional and personal training of academic lyceum students of the Ministry of Internal Affairs include ethics, conscience, passion, enlightenment, attitude, self-control, sincerity, insight, and a sense of personal improvement. At the same time, the students of the academic lyceum should be trained in the conceptual aspects of their professional spirituality, the spirit of loyalty to their chosen profession, love for the Motherland, deep respect for our rich history, the material and spiritual heritage of our fathers and grandfathers, and instill kindness and decency in their hearts and minds. , is to inculcate the concepts of respect, honesty and purity.

The approach developed by A.N. Leontiev is implemented in the process of determining the professional and personal readiness of academic lyceum students. According to him, "it is necessary to mention that professional and personal qualities can be demonstrated as an example by working in groups" [3. 36-37].

Pedagogical scientist G.M. Kodjaspirova, A.V. Morozov, etc., while defining it as the doctrine of the change of the value-normative system in the process of

developing the professional and personal preparation of academic lyceum students, it is manifested as its methodological basis in the pedagogy of the present time, the value of human life, teaching and upbringing, they show that it is a system of concepts that defines pedagogical views that form the basis of pedagogical activity and education

V.S. Kukushin expresses the opinion that the professional and personal training of academic lyceum students is a part of pedagogy, a system of values that studies knowledge, education and development of students [5; p. 142].

In the book "Kreativnaya pedagogika" published by A.V. Morozov and others, the professional and personal characteristics of students are defined as a set of concepts and teachings that show the nature of a person.

V.A. Slastenin, on the basis of pedagogical national and universal values, the values of human life, education and training, pedagogical activity and holistic education are understood and decided, it is the realization, recognition, activation and creation of material and cultural values that make up human culture. is determined by the direction of the action. The role of the mechanism of communication between practical and theoretical knowledge is performed by the national and universal value or a special "bridge" between theory and practice.

The scientific heritage recognized by our ancestors in the implementation of personality development occupies an important place in the education of patriotism. The ancient legends and narratives praising the patriotism of our ancestors, as well as the military ability, courage and skill of Jalaluddin Manguberdi, Temur Malik, Najmuddin Kubro, Amir Temur, Zahiriddin Muhammad Babur, and scientific works are real examples of this. Interesting conversations and films about the true essence of their scientific works, which
